## AI Engineer, MSc Human-centered AI

I build, ship and test AI systems, and design them around real users.

## Work Experience

**AI Engineer** (Student Worker), Topsoe May 2025 – present

- Contributed to a five-engineer AI team deploying and operating Topsoe's internal AI infrastructure, including its global chat platform, centralised LLM access, and agentic platform.
- Built evaluation pipelines using Python, DeepEval to assess deployed LLMs from multiple providers.
- Deployed and maintained system prompts, MCPs, custom GPTs, and skills; researched emerging AI technologies.
- Created Figma prototypes based on user needs and Topsoe's visual identity, then implemented UI/UX changes in JavaScript and developed full-stack applications for internal AI tools.

**Digital Service Transformation** (Student Worker), Topsoe May 2024 – May 2025

- Automated reporting by building and maintaining Excel tools and databases using VBA, SQL and Power Query.

**Data Analyst**, DTU in collaboration with COWI Sep 2024 – Jan 2025

- Analyzed spatio-temporal degradation data from Danish railway tracks in Python to identify maintenance patterns and deliver actionable planning insights.

**Teaching Assistant**, DTU & RUC Sep 2023 – Dec 2025

- Supported student learning in User Experience (DTU) and Data Science (RUC).

## Education

**Technical University of Denmark (DTU)**, M.Sc. in Human-Centered AI Aug 2026

- **Human-Computer Interaction:** Interaction design, design thinking, UX research, and AI-assisted workflow design
- **Data Science and AI:** Data analysis, responsible AI, machine learning
- **Business and Strategy:** Business analytics and marketing

**Roskilde University (RUC)**, B.Sc. in Natural Sciences, Computer Science & Mathematics. Jan 2024

## Projects

**Development of LLM-powered language learning system** | MSc Thesis, DTU. 2026
Grade: 12/12

- Researched, designed, and built an AI-powered language-learning platform, using learner research to shape a product that generates learning content on demand.

## Certifications

**Microsoft Power BI Desktop for Business Intelligence**
Udemy online course on creating interactive dashboards in Power BI. Credential available here.

## Languages

English (fluent), Latvian (fluent), Russian (fluent), Danish (intermediate)
